## **Router bits with continuous and opposite spiral**

*Obtained from massiv carbide and manufactured with continuous and opposite spiral.*

*Suitable for cutting massiv wood, MDF and chipboard panels with layers on both sides.*

*These new router bits grant a better finishing than the router bits with double uncontinuous and opposite one.*

*There's no cost of sanding: it's possible to paint directly.*

*Reduce your working  
time*

*Ask for a sample!*
