MANUALE TECNICO - TECHNICAL MANUAL

ASSEMBLY - MONTAGGIO

- 1) Clean up the tool body and the inserts' seats from any impurities.
Ripulire corpo utensile e sedi inserti da eventuali impurità.
- 2) Place the DP insert into the seat.
Posizionare inserto DP nella sede.
- 3) Press lightly to the end of the seat.
Esercitare una leggera pressione verso il fondo della sede.
- 4) Make sure of the correct positioning of the Insert.
Assicurarsi del corretto posizionamento dell'inserto.

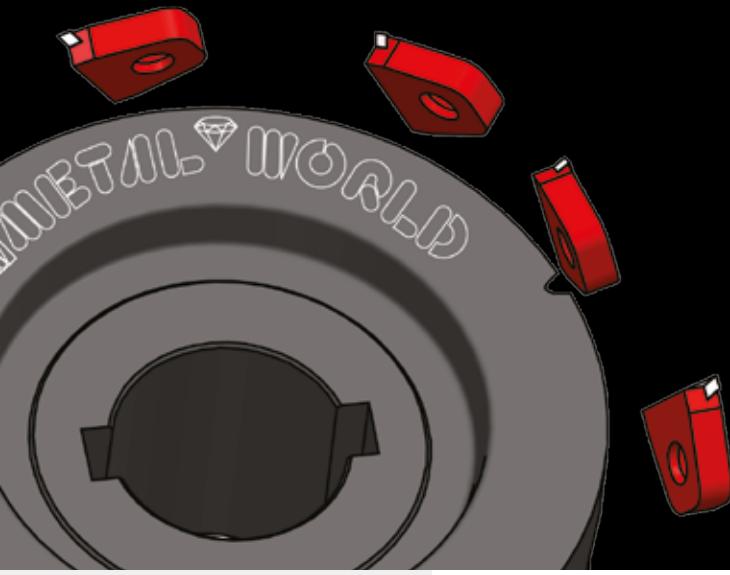

- 5) Lock the screw until the "CLICK" for stress (5 N m), using the included dynamometric key.
Avitare la vite in dotazione serrando fino al "CLICK" da sforzo (5 N m) con l'apposita chiave dinamometrica in dotazione.
- 6) Repeat it for each insert.
Ripetere l'operazione per ogni sede ed inserto.
- 7) Set the tool on the spindle of the machine.
Posizionare l'utensile nell'albero motore della macchina.

DISASSEMBLY/REPLACEMENT - SMONTAGGIO/SOSTITUZIONE

- 1) Unscrew the clamping screw with the supplied key.
Svitare la vite di fissaggio con l'apposita chiave in dotazione.
- 2) Remove the DP insert from the seat.
Rimuovere l'inserto DP dalla sede.
- 3) Clean up the tool body and the inserts' seats from any impurities.
Ripulire corpo utensile e sedi inserti da eventuali impurità.
- 4) See point "2".
Vedi punto "2".

VICTORIA D

THE SELF POSITIONING JOINTING CUTTER

SELF-POSITIONING AUTOPOSIZIONANTE

Head with self-positioning PCD insert, easily replaceable with the supplied torque wrench.
THE SYSTEM IS AN EXCLUSIVE PATENT OF METAL WORLD SPA.

Testa con inserto in PCD auto posizionante, facilmente sostituibile con l'apposita chiave dinamometrica in dotazione. Il sistema è un BREVENTO ESCLUSIVO DI METAL WORLD SPA.

NO SHARPENING NON RIAFFILARE

The PCD insert does not need regrinding on the head. Thanks to the fast and accurate replacement of the PCD insert, the continuity of work is guaranteed.

L'inserto in PCD non ha bisogno della riaffilatura sulla testa. Grazie alla veloce e precisa sostituzione del inserto in PCD, la continuità di lavoro è garantita.

PRECISION PRECISIONE

The system guarantees a high degree of finish thanks to the high precision of the tool.
Il sistema garantisce, un alto grado di finitura grazie all'elevata precisione dell'utensile.

ONE KNIFE UN COLTELLO

One single PCD insert (interchangeable) usable for all diameters. Simplicity in the management of the spare part, a single PCD insert for all the cutter head models (T070D).

Un solo inserto in PCD (intercambiabile) utilizzabile per tutti i diametri. Semplicità nella gestione del ricambio, un solo inserto in PCD per tutti i modelli di testa (T070D).

NO FERROUS METAL NON E' METALLO

Special Aluminum Alloy body construction.

Costruite con un corpo di una speciale Lega di Alluminio.

BLACK NERO

The tool is coated with a special "BLACK-MW" treatment, to give to the tool greater mechanical resistance and better chip evacuation.

L'utensile è rivestito con uno speciale trattamento "BLACK-MW", per conferire all'utensile una maggiore resistenza meccanica ed una migliore facilità di evacuazione del truciolo.

LOW NOISE RUMOROSITÀ

The design of the body and the positioning of the cutting edges, significantly reduce the noise of the tool.

Il design del corpo della testa ed il posizionamento dei taglienti riducono notevolmente la rumorosità dell'utensile.

VIBRATIONS VIBRAZIONI

Significant vibration reduction due to the lightness of the body.

Notevole riduzione delle vibrazioni, dovuto alla leggerezza del corpo.

MACHINES MACCHINE

Applicable on the main Edge Banding machines: SCM,BIESSE, BRANDT,CEHISA, HOLZER, STEFANI, FELDER, HOMAG, IMA, OTT, FRAVOL, HEBROCK.

Utilizzabili sulle principali macchine bordatrici: SCM, BIESSE, BRANDT, CEHISA, HOLZER, STEFANI, FELDER, HOMAG, IMA, OTT, FRAVOL, HEBROCK.

CUSTOMIZED PRODUCT PRODOTTO PERSONALIZZATO

In case of special machines, we are able to customize the product.

Je nach Modell der Maschinen sind auch Sonderausführungen lieferbar.
